It s my first tab and I ve had some help, but it s perhaps not overall correct, but you can play it like this.

In the Chorus the Dm is played two times. I think it sounds better, if you play the second one as a barre chord on the 5th fret.

The Csus2/B sounds more right when you play the E as a bass, but I really don t know how this chord would be called. If that s too complicated, play an Em.

No capo

Standard tuning

(Intro)

C Csus2/B F

(Verse)

C Csus2/B F
The streets are built on solid ground the memories in my mind
C Csus2/B F
the story of special times that follow special lines
C Csus2/B F
I ve grown accustomed to your face the shadows and the light
C Csus2/B F
And every street looks different when the colors are so bright

(Chorus)

Am Em
And if you want you can join me quitely
Am Em Dm
I carry you home on my back
Am Em Dm
All the way to you on a fastest track
Am Em Dm
We can run, we can walk, we can see when the dark sets in
Am Em Dm
And then I wave goodbye and I know I ll see you again

C Csus2/B F

A place so far away from here with a certain thrill
