

Cuckoo

Adam Lambert

Hey guys, I did this tab and my guitar teacher at school told me that it's accurate, though I'm not sure 'cause Tommy's using other chords (I figured it out by listening to and watching the Z100 version). Although I'm singing Cuckoo with these chords and it sounds okay ...

The last chorus is one of Adam's easier ones, you know he seems to love playing with his vocals ...

(to make it easier to play put a capo on the first fret and use: Dm-F-B-Gm-C-Dm)
