

Lower your head and take it in the body

AFI

This is one of the better songs on Shut Your Mouth and Open Your Eyes. Its not that hard to play and I m curious as to why no one tabbed it out. Well, I took the liberty and here s what I came up with. Its pretty much perfect, if not entirely.

This song can also be played with barre chords, but then you have to have kinda fast fingers. It sounds good either way.

*= play a few times

pm= palm mute
