Lovers Hands
Alan Doyle

-Standard Tuning

-No Capo-

The chords are played as follows:
*All verses and choruses are played the same way
C#: x32010
F#: 133211
G#: 320003
Bbm: x02210

[Intro]
C#, **F#** (x2)

[Verse 1]
C#   **F#**
Let it be dark in this caravan
C#   **F#**   **G#**
Rocky lightning striking metal in the sand
C#   **F#**
I m miles from common sense, as welcome as the rain
C#   **F#**   **G#**
So close to madness that I even know it s name

[Chorus]
        F#   **C#**
Lay your lover s hands upon me
       G#   **C#**
Let me understand, you know?
        F#   **C#**
Lay your lover s hands upon me
      G#
Let me go
 F#   **C#**
Lie to me sweetly
        G#   **Bbm**
Then discreetly leave me alone
        F#   **C#**
Lay your lover s hands upon me
      G#
Let me go
Aw, let me go

[Instrumental]
C#, **F#**

[Verse 2]

Let there be thunder, let me feel the trembling pain
It takes me, now I m desert clean, I ll never be again
Long past the dangerous point, I m open and I m free
I gave up the anchor when I gave up the sea

[Chorus]
Lay your lover s hands upon me
Let me understand, you know?
Lay your lover s hands upon me
Let me go
Lie to me sweetly
Then discreetly leave me alone
Lay your lover s hands upon me
Let me go
Aw, let me go

[Instrumental]
C#, **F#** (x2)

[Bridge]
      Bbm
And the storm hits
    G#
My finger tips
      F#   **G#**
And I m prone to miss the pyramids
  Bbm   **G#**   **F#**
I married that man the moment I could date
        Bbm
And the flag snaps back
      G#   **F#**
And I m scattered to the wind
        C#
And the door pretends
   G#   **C#** **F#**
I never let you in

[Instrumental]
C#, **F#**

[Verse 3]
Let it be dark in this endless caravan
Rocked by lightning, striking metal in the sand
I m miles from common sense, as welcome as the rain
So close to madness, that I even know her name

[Chorus]
Lay your lover s hands upon me
Let me understand, you know?
Lay your lover s hands upon me
Let me go
Lie to me sweetly
Then discreetly leave me alone

Lay your lover s hands upon me
Let me go
Aw, let me go

[Outro]
C#, F# (x2)
