

Sister Blister
Alanis Morissette

Song: Sister Blister
Album: Feast On Scraps

Intro

A- F E

verses (the same chords through all the verses)

A- F E

you and me we re cut from the same cloth
it seems to some we famously get along
but you and me are strangers to each other
cuz you and me: competitive to the bone

such tragedy to trample on each other with how much we ve endured
with the state this land is in

you and me feel joined by only gender
we are not all for one and one for all

chorus

A- F E
sister blister we fight to please the brothers
we think their acceptance is how we win
they re happy we re climbing over each other
to beg the club of boys to let us in

verse

you and me estranged from the mother
you and me have felt impotent in our skin
you and me have taken it out on each other
you and me disloyal to the feminine

such a pity to disavow each other with how far we ve come
with how strong we ve been

you and me are on this pendulum together
you and me with scarcity still fueling

chorus

sister blister we fight to please the brothers
we think their acceptance is how we win
they re happy we re climbing over each other
to beg the club of boys to let us in
