

**Apology**

**Alesana**

Hi. I ve been looking at different versions of this song, but none of them were right,  
 I thought I would make a correct one.

[Verse]

**G**                    **A**           **Bm**  
 Sweat drips in my eyes  
**G**                    **A**           **Bm**  
 Screams of lust we cry  
**G**   **A**  
 To-night  
**Bm**                  **G**   **A**      **Bm**  
 you are           everything (You re everything)

You re everything  
                                  **G**  
 You re everything to me

**A**                    **Bm**                                  **G**  
 No more as I wake from this perfect dream  
**A**                                  **Bm**                                  **G**  
 I can not stay and live this lie  
**A**   **Bm**                                  **G**   **A**                    **Bm** (let it ring)  
 For I now must think only of myself  
    **G**           **A**                    **Bm**  
 And to think that you would not be scared or surprised  
                  **G**    **A**  
 I severed all these ties  
                                  **Bm**  
 This is the end

[Chorus]

**A**  
 I ll lose myself in anguish for tonight  
**F#m**    **G**  
 Help me get over you (I feel so numb to)  
                                  **G**   **A**    **Bm**  
 I feel so numb to see this bitter end  
                                  **G**           **A**    **Bm**  
 It has come to this one last kiss  
                                  **G**           **A**      **Bm**  
 Broken pieces will not mend  
                                  **G**    **A**                                  **Bm**  
 To save our past (To save our past now)  
                                  **Bm**

This is the end

**A**

I ll lose myself in anguish for tonight

**F#m** **G**

Help me get over you

**Bm** **A**

One last false apology

**F#m** **G**

Help me get over you

**Bm** **A**

In my mind

**F#m**

Blood drips from your eyes

**G**

**Bm**

A beautiful last goodbye
