

**Black The Sun**  
**Alex Lloyd**

Alex Lloyd, Black the sun.

Tabbed by Dane Couchman, danecouchman@hotmail.com.

Hi everyone. This is the tab for Alex Lloyd s \ Black the sun\ off his debut album. I worked this out when I was playing my classical acoustic at home. It s pretty basic and easy to strum to, here s how it goes:

Intro: **Bm**        **D**        **G**        **D**        (x2)

Verse: **Bm**                    **D**  
                                black the sun  
                                **G**                    **D**  
                                oh no, look at what we done.....

Repeat chords for verse

Chorus: **Bm**                    **D**  
                                dream with me  
                                **G**                    **D**  
                                I hope you will dream with me

Repeat chords for chorus

2nd verse:        **Bm**                    **D**  
                                words we speak  
                                **G**                    **D**  
                                pictures are the only things I keep.....

Repeat chords for 2nd verse

Chorus

Bridge: **Bm**        **D**        **Bm**        **D**  
                                **Bm**        **D**        **A**        **G**        (x3)

Chorus (repeat)

End with:        I wish you would black the sun, the sun

(end on D)

That s it. Well I hope I m right, I m only new at this. Can t wait for Alex s new album.
