Every woman has a name

You had your love affair
Some were perfect but most of them were pain
Seems a hundred years ago
It took you to the highest hill
Left you standing frozen in the rain
But you still feel the afterglow

And even when your world was shakin

Even when your breath was taken
Even when your blue eyes turned to gray

Housewives cryin on the phone
Every woman has a name
Sacred sisters all alone
Every woman has a name
And even on the coldest day
When the kids are gone, moved away
