

Live Young Die Fast
Alkaline Trio

Hey, this is a really simplistic version of the live young die fast chords. Its still fun to play and real easy, if you want to funk it up just and some chord variants. and also i kinda suck at guitar and never really learnt the chord names so the names of the chords are probably all wrong lol. Have fun with this, a great song by an even better band and acoustically makes the hairs on balls stand on end!!
