I took a walk for the very first time On the dark side of the dance floor Lit a match just to heat things up But I got more than I bargained for

Mixed drinks, mixed feelings of elation I should have known it was a one-night invitation

Don t sweat it, forget it Everything is a-okay Just let it go then it s Off to find another face I ll make you come just to watch you leave You walk around with my heart on your sleeve Don t sweat it, it s over now Our time ran out

I took an oath, but I m giving it up You didn t have to see things my way Nothing more than a casual fuck Isn t that just how we operate?

Let s drink to feelings of temptation You and I, we re an overnight sensation

Don t sweat it, forget it Everything is a-okay Just let it, go then it s Off to find another face I ll make you come just to watch you leave I walk around with your heart on my sleeve Don t sweat it, it s over now Our time ran

Outside, the brake light s started to dim I feel the tension that s been pulling us in And then we do it again So we can feel all right Falling in love for the night

Don t sweat it, forget it Everything is a-okay Just let it go then it s Off to find another face I ll make you come just to watch you leave You walk around with my heart on your sleeve Don t sweat it, it s over now

Our time ran out Our time ran out Our time ran out Our time ran out Our time ran out

END..THANKS!!
