Sandy
Allah-Las

Sandy by The Allah-las (off their self titled album)

http://allah-las.com

I think that they use bar chords here, but the open chords sound okay too.

Intro: **C#m   G#m**

Verse:

```
                        C#m        G#m
Time after time, girl

                        C#m        G#m
Like Daedalus  child

                         C#m      G#m
You wasted your mind, girl.

You had to be wild.
```

Chorus:

```
    B                    F#
Now I see that you re lost.

C#m                G#m
I gotta pain for you.

    B                              F#
Don t think  bout what you ve done,

C#m                G#m
But what you can do.

    B                          F#
Time flies when you re having fun,
```

```
C#m                        G#m
But where does it go?

     B                              F#
You flew too close to the sun.

C#m                            G#m
Now you just don t know.

Interlude:  C#m   G#m  (x4)

Alternate Chorus:

E          F#                    G#m          G#m
I can t believe the things you say.

E            F#                  G#m          G#m
You couldn t mean them anyway.

E                          F#
You tried to give me a run-around,

G#m                        G#m
But I ain t gonna let you run my town, no.

E            F#                          G#m
I can t believe the things you say.

Interlude:    C#m    G#m

                   C#m    G#m
Time after time, girl.

                   C#m    G#m
Like Daedalus  child

                   C#m    G#m
You wasted your mind, girl.

You had to be wild.

Chorus:
```

```
      B                        F#
Now I see that you re lost.

C#m                   G#m
What s you gotta do?

    B                          F#
Those t s you ve left uncrossed

C#m                     G#m
Are coming back to you.

        B                        F#
Time flies when you re having fun,

C#m                      G#m
But where does it go?

      B                      F#
You flew too close to the sun.

C#m                  G#m
Now you just don t know.

Outro:    C#m     G#m   (x4)
```
