

Scars

Allison Iraheta

Yay for my 2nd tab! ANYWAY, i used a variation of the other version of scars on ultimate guitar, added a capo, and used a different chord progression. There IS a key change at the end, and if u can't play F#m just try to. I couldn't either, but i tried it a few times, and now i can. Anywhere where there is no chords listed, use the chord progression
G D Em C Hope u like it! CAPO 4
