Chords used during song
```
     Fm      Bbsus  Cm
e|--3-----3------2-------------------------------------------------|
B|--3-----3------2-------------------------------------------------|
G|--0-----2------2-------------------------------------------------|
D|--2-----0------4-------------------------------------------------|
A|--2-----0------4-------------------------------------------------|
E|--0-----2-----(2)------------------------------------------------|
```

Intro- These chords keep that D sound going
that you hear on the piano, you can use these
or regular chords, your call. These are the
ones I use though. Once the song kinda picks up
you can switch to normal chords if you prefer,
except on the **F7** because a normal **F7** doesn t sound right.
```
     Eb     G#     F7       G#
e|---------------------------|
B|---3----3----3--------3-----|
G|---2----2----2--------2-----|
D|---0----0----0--------0-----|
A|---0----x----2--------x-----|
E|--------3------------3-----|
```

Note: Don t get butthurt about the names
of the chords I m not sure what they
should be called exactly. Just roll with it.

is going on but I think these are the chords.
But it was really hard to tell so use at your own risk.
