Verse 1:
```
D                A                    Em
```
Take me home, I m so sick of everyone
```
                            G
```
There s nothing for me here but all

The ones who don t
```
D
```
care at all
```
A                            Em
```
About where I needed to go
```
                      G
```
This ship has been sinking from the day we chose
```
      Em
```
To leave that eastern coast
```
G
```
Sail away, hope for the most
```
Em
```
Until we fell below
```
      G                  A
```
The tale of dreams I thought we all followed

Chorus:
```
D
```
This time its me on my own
```
A
```
Finally free and I won t
```
Em
```
Give up my dreams for no one
```
       G
```
Or be a pawn of what they want me to
```
D
```
This time be sure they ll listen
```
A
```
To what I say, I ll mean it
```
        Em
```
With every single word, I ll make sure I am heard
```
     G                          A
```
So they won t have a doubt of what I want to be

Verse 2:
```
D                A                    Em
```
And every time that I would speak
```
                              G                          D
```

You never listened, words came out, but you fell asleep
```
          A                    Em
```
And you expect for my technique
```
                              G
```
To slowly weaken till the point where

you could just defeat me
```
D
```
Well no no sir, I don t think so
```
A
```
That s just not the way it works here
```
Em
```
And oh oh, do I feel for you
```
G
```
How could you just let it blow out to sea
```
Em
```
And leave that eastern coast
```
G
```
Sail away, hope for the most
```
Em
```
Until it fell below
```
G                        A
```
The tale of dreams I thought we all followed

(Chorus)

Bridge:
```
Em                          G                    A
```
So take take take it all away (Just take take take it all away)
```
Em
```
The moment that you know
```
G                          D
```
Know and realize it s a waste
```
                 A
```
To keep asking why the time s passing
```
        Em                      G
```
We ll watch the stars from above
```
                      A
```
Shine a different light

(Key Change)
Chorus:
