(play soft and melancholy)

[Verse 1]

**Am**                                  **F**                  **G**  
When the last eagle flies over the last crumbling mountain  
          **Am**                                  **F**                  **G**  
And the last lion roars at the last dusty fountain  
          **Am**                  **Em**                          **F**                  **C**  
In the shadow of the forest, though she may be old and worn  
          **F**          **C**  
They will stare unbelieving  
          **F**          **G**          n.**C**  
At the last unicorn

[Verse 2]

**Am**                                  **F**                  **G**  
When the first breath of winter through the flowers is icing  
          **Am**                                  **F**                  **G**  
And you look to the north and a pale moon is rising  
          **Am**                  **Em**                          **F**                  **C**  
And it seems like all is dying and would leave the world to mourn  
          **F**                  **C**  
In the distance hear her laughter  
          **F**          **G**  
Of the last unicorn  
          **C Am**          **G**  **Am**  **Em**  **F**  **G**  
I?m alive????I?m alive

[Verse 3]

**Am**                                  **F**                  **G**  
When the last moon is cast over the last star of morning  
          **Am**                                  **F**                  **G**  
And the future is past without even a last desperate warning  
          **Am**                  **Em**                          **F**                  **C**  
Then look into the sky where through the clouds a path is formed  
          **F**                  **C**

Look and see her how she sparkles

**F G**

It's the last unicorn

**C Am G C Am7 G Am Em F G**
