

My Only Enemy
American Hi-Fi

Song: My Only Enemy
Band: American Hi Fi
Album: American Hi Fi

This is the first time I've put any music on the net, but I'm sure I'm right with this song. It's pretty

I'm not sure what the lead guitar underdub is in the first and third verses, but the rhythm guitar is

Anyhow, here goes:

Dropped-D tuning

D C F G

I don't ever try to keep the love alive, you found the frequency, you sucked it out of me

I'm not the only one to hold a smokin' gun, you felt the gravity, you think you're finally free

I don't even know which way it oughta go, get out before you drown, before they bring us down

It's all inside of me, my only enemy, you sucked it out of me, you fucked it out of me

D C F G

And watch the world turn on, and watch the world turn on

And watch the world turn on, my only enemy

[**D D D D** (harm.) **D D D D F F**] x 2

Bb F D F Bb F D

I want it all before you go, I want it all before you go I want it all before you go

I don't ever try to keep the love alive, you found the frequency, you sucked it out of me

You sucked it out of me, you sucked it out of me, my only enemy, my only enemy

And watch the world turn on, and watch the world turn on

And watch the world turn on, my only enemy

My only enemy, my only enemy, my only enemy, my only enemy

D D D D (harm.) **D D D D F F**

Well fuck you, well fuck you

End on F

I m sure this is right. Any corrections, comments, etc, email me at
