

From The Heaven Of My Heart
Amorphis

I like the song very much, so I thought I'd figure out the chords for those of you who want to entertain friends at a party or who just want to get laid, but without having to play those cheesy songs that everybody has heard a thousand times before. The song belongs to its rightful owners, and unfortunately I am not one of them. As far as I know it is written by the guys from Amorphis and you can find it on their amazing album Skyforger. Oh by the way, it is a very easy song to play, but only if you're familiar with bar chords. If not, you'd better go practice those first. Enjoy ;)
