

Ode To Phil
Andy Hillstrand

Here s the tab for the introduction section of the song before Andy starts singing. I m still a little sketchy about the last part as I feel as if I am missing a note or two btu this is as close to the last part as I could get. If anyone else has figured out the end section of the introduction before the audio feel free to e-mail or post corrections in the comments section =)If the tab is difficult to read please let me know. The first line of the B string introduction is played twice before playing along the G string.
