

**Cast No Shadows**  
**Ann Beretta**

Okay, I m not sure if this is totally right as I did it by ear, and it doesn t have all the odd pickings that are every else in the song. However, as no one else has tabbed this, I believe these chords to be right and fit well with singing and playing the song. If anyone knows how to play it perfect, and would like to correct me or add to it, by all means email me at guth1004@gmail.com. Enjoy. When I first tried this it didnt work, this band does exist, I don t know much about them, but my friend sent me this song and I love it.
