

**For Bitter Or Worse**

**Anouk**

(Fm) Haven t we both heard enough babe

This is what we re gonna do (B)

(Fm) Let me put my arms around you once more

There s nothing left here to prove (B)

(Fm) Walk away just a little bit slower

Better hold on tight, will we ever learn to let it go (B)

(Fm) Break Through to the other side

I keep wondering

When were you ever gonna let me know (B)

That you (C#) just wanted some (C#m) thing else in life (B)

(B) What do you say (G#) when it s all (Fm) over

(B) What do you (G#) know when nothing s going right

The troubles in your mind (Fm)

(B) What do you do (G#) when you get (C#) lost (C#m) inside (B) your (F#) soul

Where do you go when love s (E) gone

What do you say nothing at all

(Fm) It was so hard when I watched you falling down

But it was time for you to walk alone (B)

(Fm) Just know if you really need a friend

And you re feeling like you can t go on (B)

(Fm) Just walk back just a little bit faster

Take my hand I will blow your fears away (B)

(Fm) Break through to the other side

For bitter or worse I know you better than anyone else (B)

And (C#) I ll (C#m) be by your side (B)

(B) What do you say (G#) when it s all (Fm) over

(B) What do you (G#) know when nothing s going right

(B) What do you do (G#) when you get (C#) lost (C#m) inside (B) your (F#) soul

Where do you go when love s (E) gone

What do you say nothing at all

(B) When it all becomes reality

(F#) That this is where it ends for you and me

(Eb) I m about to lose my mind

(Fm) Will love find a way on time

(B) Please don t try and kiss these tears away

(F#) We know we ve both have made mistakes

(Eb) If I could do it all again

(Fm) I wouldn t change a single thing

(Eb) What do you say (C#) when it s all (B) over

(Eb) What do you (C#) know when nothing s going right (B)

(Eb) What do you do (C#m/D) when you get (C#) lost (C#m) inside (B) your (F#)  
soul

Where do you go when love s (E) gone

What do you say nothing at all

What do you say nothing at all

What do you say nothing at all
