ok, heres the weird part, right here they drop the low Eb down to Db they use D-tuners but the way i do it is pluck the Eb and the Db together and just match the Eb to the tone of the Db. the rest of the song uses this alternate tuning

thats the music, you have yo figure out how many times to play each riff.
 i put the lyrics in here too.

Lyrics:

I try to imagine the best place I ve been
 Can I go back again?
 Open my eyes, what was no longer exists,
 I can t go back again
 I like to pretend that nothing has changed
 And never went too far
 But it started to lose me like a four-hour movie
 I d already seen
 Holding onto my memory of what this used to be
 Holding onto my memory of you

Sometimes I tell myself that things are O.K.
 Another lie but it makes me feel better
 Never as old as I was today
 I m gonna breakdown

Break myself just to live this way
 Never as old, as I was today

Look in my eyes and see how sick I feel
 About what you ve become
 Filthy and twisted like you never existed
 I know what you were
 Your beauty forgotten under mountains of schism
 I don t want to climb
 Giving up my memory of what this used to be
 Giving up my memory of you

Sometimes I tell myself that things are O.K.
 Another lie but it makes me feel better
 Never as old as I was today
 I m gonna breakdown

Break myself just to live this way
 Never as old, as I was today

Try to imagine the best place I ve been
Can I go back again
Open my eyes it just no longer exists
I can t go back again
I m giving up my memory of what this used to be
Giving up my memory of you
