A                                    E
Until the sun burns from the sky
A                                    C#m              E
Until the sun burns so bright this world is no more

Sun burns from the sky...
                B
And all the people are just dust on the ground

One trillion dollars, what a bullshit useless thing

Ending Chorus:

Shit loads of money spent will show us wrong from right
B
Fuck the world,
         E                   End on E
Fuck  em all

Note: There is this kind of bass thing after each line of the verses that leads
from the E major chord to the C#m chord. On acoustic guitar I think it can be
played like this:

     E              C#m              C#m                  E
e|--0-------------4-------|-------4--------------0---------|
B|--0-------------5-------|-------5--------------0---------|
G|--1-------------6-------|-------6--------------1---------|
D|--2----2-1------6-------|-------6--------2----2---------|
A|--2--------4----4-------|-------4----4--2------2---------|
E|--0--------------------|-------x-------------0---------|
