

Circles
Apulanta

Artist : Apulanta

Song: Circles

Tabbed by : Leddhedd

Email : leddhedd@nawtek.com

This is my first tab/transcription so go easy :P if you have any suggestions or corrections just email me

There is a main riff that can be played over the top of the instrumental bridge and as in intro. there are several ways to play it, depending on if you are playing solo acoustic or have another guitarist, however i

find it easiest to play the riff based on the Am shape as it allows me to play it as an into and then start straight into the verse with little effort

Main Riff :

```

e|-----0---|
B|-1-0---1-0---1-0---1-0---0-1-3-----|
G|-----|
D|-----2-----2-----2-----2-----|
A|-----|
E|-----|

```

I Feel that playing an E before going into the Am makes the transition more prominent than from a C, but its not strictly necessary

Am **F** **C** (optional) **E**
Life in this world with codes of bars

Am **F** **C** **E**
Feels like you re a fly trapped in a jar

F **C** **E**
The walls just keep on closing in

Am **F** **C** **E**
So fucking cheap is everything

Chorus

Am **F** **C** **G**
Run around in circles all your life

Am **F** **C** **G**

Doing all those things you don t know why
All the faith in good been burned by fire
But you know you must keep crawling on and on

(Am F C G) x2

(or play 4 if you have someone playing the main Riff over the top)

There s nothing more than shades of gray
No feeling in those brand new scales
Screams just get louder in your brain
We ride on deeper down the drain

Chorus

Run around in circles all your life
Doing all those things you don t know why
All the faith in good been burned by fire
But you know you must keep crawling on and on

Mute strum for a percussive effect

Run around in circles all your life
Doing all those things you don t know why
All the faith in good been burned by fire
But you know you must keep crawling on

Run around in circles all your life
Doing all those things you don t know why
All the faith in good been burned by fire
But you know you must keep crawling on
