Six Feet Over Ground
Aquilo

[Verse 1]
```
  Bbm                            F#
Today s the day I found myself alright
        Bbm                            F#
When I look ahead, pretend it never came
  Bbm                          F#
I found a way to keep my head above
          Bbm                          F#
But the hardest part is to say  No it s not
```

[Pre-Chorus]
```
      Ab                    Bbm              F#
But I drove home with my mind turned off for once
          Ab          Bbm              F#
And its funny what you hear when you don t say a word
```

[Chorus]
```
          C#                    Eb
Well I m okay, and I m still breathing
          C#/F          F#
I m still six feet over ground
        Ab
But you don t need to know now
     Bbm                          F#
You don t need to know how I m doing
```

[Verse 2]
```
Bbm                          F#
Yesterday I told you I was down
   Bbm                            F#
A stupid thing to tell you when I feel just fine
      Bbm                            F#
And all your friends came fishing for a fire
   Bbm                            F#
I come to you with words you know I d never say
```

[Pre-Chorus]
```
      Ab                    Bbm                  F#
But I drove home with my mind turned off for once
     Ab              Bbm                  F#
And its funny what you hear when you don t say a word
```

[Chorus]
```
          C#                    Eb
Well I m okay, and I m still breathing
          C#/F          F#
I m still six feet over ground
```

```
          Ab
But you don t need to know now
     Bbm                          F#
You don t need to know how I m doing

        C#                    Eb
But I m okay, and I m still breathing
        C#/F            F#
I m still six feet over ground
        Ab
But you don t need to know now
     Bbm                          F#
Well you don t need to know how I m doing

          Ab
Cause you don t need to know now
     Bbm                          F#
You don t need to know how I m doing
```
