Still in the Dark (Acoustic Version)

Aranda

My first guitar tab submission. Hope I got everything correct. This is a great

song. Hope you enjoy playing it as much as I do.

Guitar tuning down one whole step or half step (I ve seen them play it both ways)

I can t sing it unless I m down a whole step.

C

I know how much you need your space

It s a lonely place to find what you ve been looking for

You strayed off the beaten path

And making your way back is harder than it was before

Somebody got the best of you and left behind the rest of you

Who used up your heart and kept you in the dark

And I know there s another side

That you never show that I gotta find

And it s not all in my mind

And I m here every night and day

I could be the one your love could save

Baby you left your mark but I m still in the dark

Bridge

G

But my heart knows when it s love

And I know there s another side

That you never show that I gotta find

And it s not all in my mind

I could be the one your love could save

Baby you left your mark but I m still in the dark

I am empty I am done
