Let the record show: It s 1964 in the city of New York.
Take the train to Queens and meet a Jewish Family, he s the youngest boy of three.
His brothers have left home and he s on the same road, just credits shy of a Diploma.
But he wants to represent the struggling with rent, and he can t live on both sides of the fence.

G - F - Em

He continues to insist that he s no champagne socialist.

D - Am - G

Now he s not coming back. After studying the facts, he knows all the problems in the past.
And he s quick to concede, that in order to proceed, you can t just keep on preaching when we need.
To become a working man is to live and work with them... and this is something you can t pretend

G - F - Em

So he continues to insist that he s no champagne socialist
