Diagram of a 5-qubit quantum circuit. The circuit has five horizontal lines representing qubits, labeled  $e$ ,  $8$ ,  $8$ ,  $10$ ,  $10$  from top to bottom. The bottom line is also labeled  $E$ . The circuit consists of several gates: a CNOT gate from qubit  $e$  to qubit  $8$ , a CNOT gate from qubit  $8$  to qubit  $8$ , a CNOT gate from qubit  $8$  to qubit  $10$ , a CNOT gate from qubit  $10$  to qubit  $10$ , a CNOT gate from qubit  $10$  to qubit  $E$ , and a CNOT gate from qubit  $E$  to qubit  $8$ .
