The Labyrinth Song
Asaf Avidan

[Verse 1]
Dm
Evening rises, darkness threatens to engulf us all
            C
But there s a moon above it s shining and I think I hear a call
          Dm
It s just a whisper through the trees, my ears can hardly make it out
       C
But I can hear it in my heart, vibrating strong as if she shouts

[Chorus]
       Am   **G**
Oh Ariadne, I am coming, I just need to work this maze inside my head
                                      Am
I came here like you asked, I killed the beast, that part of me is dead
                            G
Oh Ariadne, I just need to work this maze inside my head
                                   Am
If only I d have listened to you when you offered me that thread

[Instrumental]
G Am

[Verse 2]
Dm
Everything is quiet and I m not exactly sure
     C
If it really was your voice I heard or maybe it s a door
                Dm
That s closing up some hero s back, on his track to be a man
       C
Can it be that all us heroes have a path but not a plan?

[Chorus]
          Am   **G**
Oh Ariadne, I m coming, I just need to work this maze inside my mind
                                      Am
I wish I had that string, it s so damn dark, I think I m going blind
                             G
Oh Ariadne, I just need to work this maze inside my mind
                                    Am
For the life of me I don t remember what I came to find

[Instrumental]
G Am

[Verse 3]

```
           Dm
Now tell me princess are you strolling through your sacred grove?
              C
And is the moon still shining? You re the only thing I m thinking of
                 Dm
The sword you gave me, it was heavy, I just had to lay it down
                  C
It s funny how defenseless I can feel here when there s nobody around

[Chorus]
              Am                                                    G
Oh Ariadne, I m coming, I just need to work this maze inside my heart

                                                           Am
I was blind, I thought you d bind me, but you offered me a chart
                                              G
Oh Ariadne, I just need to work this maze inside my heart
                                                    Am
If I d known that you could guide me, I d have listened from the start

[Instrumental]
G   Am

[Verse 4]
Dm
Somewhere up there there midnight strikes, I think I hear the fall
          C
Of little drops of water, magnified against the barren wall
              Dm
It s more a feeling than a substance, but there s nobody around
              C
And when I m in here all alone, it s just enough to let me drown

[Chorus]
              Am                                                    G
Oh Ariadne, I was coming, but I failed you in this labyrinth of my past
                                                     Am
Oh Ariadne, let me sing you, and we ll make each other last
                                              G
Oh Ariadne, I have failed you in this labyrinth of my past
                                             Am
Oh Ariadne, let me sing you, and we ll make each other last

[Outro]
G   Am   G   Am
```
