[Verse 1]

Don t waste your life behind that guitar
You may get gone, but you won t get far
You re not the first, you won t be the last
And you can tell us all about it when you come crawling back
That road you re on, just winds and winds
Your spinning your wheels and wasting you re time

[Chorus 1]

But when the lights come up and I hear the band
And where they said I d never be is exactly where I am
I hear the crowd, I look around
And I can t find an empty chair, not bad for a girl goin nowhere

[Verse 2]

I get these calls, out on the road
Heard your song on my radio
We always said you d make it big
And I tell all my friends, I knew you back when
So don t for- get all us little folks
And when you crash and burn, remember we told you so

[Chorus 2]
