C

```
No One Will Save You
Aviators
[Intro]
Е C x4
A Dm A F
[Verse]
                   Dm
I hear music in the air tonight
One familiar fading tune
                    Dm
Something pulls at my infected soul
I think I remember you
[Chorus]
                    Dm
I burned your world away
Devoured by my conviction
I left you home afraid
While mother s ventured out
Don t cry when lanterns fade
Soon we ll be awakened
                          Dm
But it breaks my heart to say
No one will save you now
[Interlude]
A C 4
[Verse]
                   Dm
I could be your own avenging angel
But this dream is ending soon
Don t you scream when all the wolves come find you
Underneath this bleeding moon
[Chorus]
```

Dm

```
I burned your world away
Devoured by my conviction
I left you home afraid
While mother s ventured out
Don t cry when lanterns fade
Soon we ll be awakened
But it breaks my heart to say
No one will save you now
[Verse]
                   Dm
Listen closely for your sister s footsteps
Lest you fade here all alone
                   Dm
I have never seen a night this haunting
In these streets of blood and bone
I can t hold the beast
that crawls through my veins
Sacrificing my own eyes
                   Dm
No confessions left to purify me
Something s watching from the skies
[Chorus]
                    Dm
I burned your world away
Devoured by my conviction
                Dm
I left you home afraid
While mother s ventured out
Don t cry when lanterns fade
Soon we ll be awakened
But it breaks my heart to say
No one will save you now
```

C Dm

I hear music in the air tonight

A

One familiar fading tune

C Dm

I can t save you from the monsters coming

A

But we ll wake up very soon

Forgive me...
