

Beautiful Woman
Backstreet Boys

Okay, these chords are not 100% accurate, but they sound pretty good to me!
(Listen to
the song to hear the way the chords slides and how the beating pattern in the
verses
are - I m way too lazy to bother to type that down cause I probably would get it
wrong
anyway.)

Ps. I think the song is really played two frets higher up in the original
version, but
I hate to play so far down on the guitar, and I think it sounds better this way
anway..
