```
[Intro]   D   A   G
          D   A   G
          D   G   D   G
```

D A  
Here I am again

G D  
Waiting on the moment you decide

A G  
To leave me stranded on the edge of nowhere

D A G  
I've been so close to you so many times

D  
I feel like I could drown

A G  
I wish that I could fly away from here

But I m still coming down  
A  
From the last time  
Bm G  
That you came around  
A  
In the starlight  
Bm G A  
Now I m pulling to your gravity

Spinning helplessly

**Em** **A**

I m falling through the night

**Em** **D** **G**

Like a lonely satellite

**D** **G**

Like a lonely satellite

D                          A  
We walked on Jupiter

G    D  
Fool around the moon a time or two

A                          G  
Left a mark on every star we could find

D                          A                          G  
But now I m burning like a meteor

D  
That never hits the ground

A                          G

Wish that I could fly away from you

**Bm G**

But I m still coming down

**A**

From the last time

**Bm G**

That you came around

**A**

In the starlight

**Bm**

**G**

Something in your eyes
