    Lie, lie, lie

      E                     D
The full moon is rising over dark waters
        G               B
and the fools below are picking up sticks
        E                       D
and the man in the gallows lies permanently
                  G                         B
waiting for the doctors to come back and tend to him,

    G                     D                   C
The Flat Earth Society is meeting here today
                      B
singing happy little lies
        G               D       A                   F#
and the bright ship Humana is sailing far away
                  G     A    B
with grave determinaaaation...

and no destination

Yeah, nothing feels better than the spray of clean water
         G                    B
and the whistling wind on a calm summer night,
            E                      D
but you d better believe that down in their quarters
     G                                B
the men are holding on for their dear lives,

     G                      D                      C
The Flat Earth Society is somewhere far away,

with their candlesticks and compasses
        G             D       A                F#
and the bright ship Humana is well on its way
                      G    A    B
with grave determinaaaation...

and no destination
