the repeat for the rest

its a really straight forward song, you just have to listen to the whole * thing
is most confusing about this song is that they recorded bret playing the song
about 4

and layerd them on top of eachother. the parts dont really match up so it sounds
like

playing really compucated chords and its weird. This tab basicly describes the
diffrent

he plays, just listen to the song and play a long a bunch and youll get it.
