*verse 2:*

E                      F#                      A                      E              F#    A  
 It s a treacherous road with a desolated view

 There s distant lights but here they re far and few  
 E                      F#                      A                      E              F#    A  
 And the sun don t shine even when its day  
 E                      F#                      A                      E              F#    A  
 You gotta drive all night just to feel like you re ok

*Chorus 2:*

D    A        F#m                      A                      E        F#m  
 Ohh    These days I barely get by

 I don t even try  
 A                      E    F#m    A    E    (riff)
