Port Of Call
Beirut

[Intro]
Em Am C D
G C G C D
Am D
Am D

[Verse 1]
```
     Em   Am                      C        D
And I, I called through the air that night
   G        C     G    C D
A calm sea voiced with a lie
          Am                         D
I could only smile, I ve been alone some time
        Am                   D
And all, and all, it s been fine
```

[Verse 2]
```
     Em   Am        C           D
And you, you had hope for me now
   G          C    G   C D
I danced all around it somehow
      Am                     D
Be fair to me, I may drift awhile
          Am                 D
Were it up to me, you know I d
```

[Verse 3]
```
Em   Am                      C        D
I, I called through the air that night
     G           C  G    C D
The faults were swarming inside
        Am                      D
Was it infantile, that which we desired?
          Am                 D
Were it up to me, all from your eyes
```

[Interlude]
Am D (x4)

[Verse 4]
```
     Em   Am                      C        D
And I, I called through the air that night
```

```
      G                       C G    C D
My thoughts were still buried inside
         Am                         D
We were closer then, I ve been alone some time
             Am                             D
Filled your glass with gin, filled your heart with pride

[Verse 5]
     Em    Am       C          D
And you, you had hope for me now
  G           C    G  C   D
I danced all around it somehow
    Am                      D
Be fair to me, I may drift awhile
           Am                       D
If there s a plan for me, would it make you smile?

[Outro]
Am                   D
No, don t want to be there for no one (I d stay here)
Am                   D
No, don t want to be there for no one (That s over the sea)
Am                 D
I don t want to follow your light (On the sea)
Am                     D
No, don t want to be there for no one (I can t be saved)

Am D   (x4)
```
