In Too Deep
Belinda Carlisle

In Too Deep - Belinda Carlisle
from the 1996 album, A Woman and a Man

(Intro)

G#   C#   F#

G#   C#   F#

(Verse One)

G#   C#   F#
I was high and dry
G#   C#   F#
Don t ask me why
G#   C#   F#
We took the wrong turn that day
G#   C#   F#
Out on that long lonely highway...
G#   C#   F#
The river was pounding below
G#   C#   F#
And how we crashed, I ll never know
G#   C#   F#
But suddenly I can t swim
                              G#
So this is drowning...

(C1)
                  C#   F#   G#
Suddenly I m in too deep
                      C#   F#   G#
To ever get out
                              C#   F#   G#
I gave you my heart and my soul to keep
                                      C#   G#
Don t give me your doubts
                          C#   F#   G#
I m over my head
                                  C#   G#
And it s scaring me so...
                  C#   F#   G#
I m in too deep
                  C#   F#   G#
I m in too deep

(V2)

```
G#                      C#                      F#
Thanks for the crash course
G#                      C#                      F#
That ride upon your noble horse
G#                      C#                      F#
We jumped the fence that day
G#                      C#                      F#
And rode so far away...
G#                      C#                      F#
Will I forever roam?
G#                      C#                      F#
I only want to come home
G#                      C#                      F#
So won t you throw me a line?
                              G#
I think it s really time...

(C2)

              C#   F#      G#
Suddenly I m in too deep
                  C#   F#      G#
To ever get out
                  C#              F#          G#
I gave you my heart and soul to keep
                      C#   F#      G#
Don t give me your doubts
              C#   F#      G#
I m over my head
              C#   F#      G#
And it scares me so...

(Bridge)

F#                                  G#
So have a little faith baby
                              C#
In where we re going to
              F#
Don t ask me where
                  G#
You know I just can t tell you
                      F#
All I know is I m swept away
              G#
Taken by this undertow
 C#                      F#
Ooh, waves are crashing in
                                  G#
Baby, baby don t let me go,  cos...
     C#  F#      G#
I m in too deep
```

(rpt till fade)
