

The Great Defector

Bell X1

Just the basic chords for an acoustic guitar...corrections/comments welcome.
Enjoy!

Intro

Cadd9 G D

Cadd9 G D

I am the defector

Cadd9 G D

And you're the farmer's daughter

Cadd9 G D

You been teasing us farm boys

Cadd9 G D

Till we start talkin' about those rabbits, George

Cadd9 G D

Oh won't you tell us 'bout those rabbits, George

Cadd9 G D

I am the defector

Cadd9 G D

I give it what it needs

Cadd9 G D

Let's make a new world order

Cadd9 G D

Let's make it rhyme

Am Em F G

You're the chocolate at the end of my

Am Em F G

Cornetto

Am Em F G

I love the way your underwire bra

Am Em F G

Always sets off that X-ray machine

C F

Comin' into land and

G C F G

Now I love the colour of it all

C F

Blue lights on the runway

G C F G

I love the colour of it all

I am the defector

'Cause someone stirred my soul

With that great big stick of hers
Kinda looks like an oar

The accountants have taken the movie
Yeah, theyâ€™re on set
The people from the mobile phone company
Say who gets to play and who gets to not

Youâ€™re a picture of the check out girl
Hand me a plastic bag
I got the shits of trying to open it
As it all piles up, I wish I didnâ€™t bite my nails

Cominâ€™ into land and
Now I love the colour of it all
Blue lights on the runway
I love the colour of it all
Getting ready to spill my guts and
I love the colour of it all
To the waitress on roller skates
I love the colour of it all
Oh the colour of it all

I am the great defector
So I must affect an air
Of a man whoâ€™s maybe seen too much
But still just manages to care

Still youâ€™re the chocolate at the end of my Cornetto
I love the way your underwire bra
Always sets off that X-ray machine

Cominâ€™ into land and
Now I love the colour of it all
Blue lights on the runway
I love the colour of it all
Getting ready to spill my guts and
I love the colour of it all
To the, to the waitress on roller skates
I love the colour of it all
Oh the colour of it all

Waitress on roller skates [x8]
(Love the colour of it all) [x2]
