Meat And Potatoes

capo 1

I put the chords where the bass usually plays the root note of the chord. The
guitar
and piano usually play the chord on the up beats. The extra notes in parenthesis
are
just notes, not chords. I only tabbed out the extra notes that are featured
prominently.
 There s some swinging bass in this song, maybe someday I ll tab that too. I
hope I got
all these chords right. They re close, at least. In my old age, I sometimes
have
trouble hearing seventh chords amid all the solo instruments and walking bass
line.
