Guttersnipe
Bhi Bhiman

```
C                                                         F
I jumped the first train I saw it will surely take me home,
C                               G              C
If I had a mama at least id have a place to go,
C                                                         F
But im just a guttersnipe I got no place to wipe my nose,
C                                         G                C
I jumped the first train I saw it will surely take me home,
F                       C
A buzzard riding the rails,
F                               C
I steal my meals when all else fails,
F                           C
Im right at home on the line,
G                       C
im well on my way to feeling fine
```
