Big Time Rush

Hello everyone, this version is according to the original version of the song. There s already another version out there but I just feel like the chords are not really

according to the original song.

So I m making this cause I really love this song and I think this song deserves more justice.

Feel free to comment if you feel like there s anything wrong :)

P.S. I know some chords are still a bit off (especially in the bridge part), but this is the

closest I can get to since I m not a pro :p

[Verse 1]

Pretending for the crowd below, we put on a real good show, but it s a lie

off apart

But I ll still love you when the lights come up for our intermission
