

Something Special  
BigBang

F G Am Am x4

                  F                                  G  
Did you ever write my name with a fountain pen  
Am  
In your books or on your desk

did you tell your friends

          F  G                                  Am  
That I          was someone special

                  F                                  G  
Did you ever lie awake the entire night

Am  
Glowing in the dark with no sheets or light

                  F  G                                  Am  
Thinking that I          was someone special

G                                  F  
  You got me running

                                  G  
running late at night

                  Am  
trying to find you

G                                  F  
  And I started thinking

                                  G  
thinking all the time

                  Am  
what could I do

F                                  G          Am  
  I had something for you

F                                  G          Am  
  Was there something for me

F                                  G          Am  
  I had something to give you

F                                  G  Am  
  But it s a mystery

Did you ever change your clothes did you hesitate  
walking back and forth, always being late  
Cause I was someone special

Did you ever take a shower did you wash your face  
making up the bed thinking just incase  
That I was someone special
