I trusted a priest, I fell to his feet,
      A                 E                 B
and he raised me up there, and cut me off at the knees.
B               B
I trusted the law, they didn help me at all,
        A                 E               B
I wound up black, blue, screwed, in the back of his car.

Gb                      Abm     E           Dbm
 I don want to wake up alone, I need you to hear me now,
Gb                      Abm     E
 I don want to do it alone, I need you here with me now.
Abm                     B                   E           Db
 I don want to wait for your love, I need you to save me now!
Abm                     B                       E         Db
They got me and I never give up, but I need you to save me now.
                       Abm           B
 Well, they feed upon the poor, my head is banging on the floor,
        E                           Db
 yes, it over, yes, it over, they lying.
  Abm                   B               E
 I don want to wait for your love, I need you to save me now, save me now.

  B             B
 I once had a girl, I gave her my world,
      A                   E             B
 but she played around, put me down, still wanted the pearl.
  B               B
 So I went to a priest, yes, I fell to his feet,
        A       E               B
 and he just raised me up to cut me off at the knees.
Gb                      Abm     E           Dbm
 I don want to wake up alone, I need you to hear me now,
Gb                      Abm     E
 I don want to do it alone, I need you here with me now.
Abm                     B                   E           Db
 I don want to wait for your love, I need you to save me now!
Abm                     B                       E         Db
They got me and I never give up, but I need you to save me now.
                   Abm                   B
 the priest and the law, truth is pounding at the door,
        E                           Db
 yes, it over, yes, it over, they dying.
  Abm                   B               E                 Db
 I don want to wait for your love, I need you to save me now, save me now.
