Turn Around
Billy Joel

(**Am   D**)

```
G           C/E   Am                    D/F#
Oh, sweet lady, runnin  like a stream
G                 C/E           Am                      D/F#
You don t look back because you know your hands are clean
G           C/E   Am              D/F#
You make believe the past was just a dream
     Am               D/F#              G
You make believe the past was just a dream
```

(then a quick change to **G7** here just before the chorus)

```
Em            Am    C
Turn around, turn around
C         D/F#            G
And I will sing for you a song ( I think another quick change to **G7** sounds good
here to)
Em            Am           C
I don t know where you been
C         D/F#            G
But you ve been gone too long
```

Oh, Elisa, you must begin again
And all the roads that you have walked are comin to an end
I was your lover but I thought I was your friend
I loved you but I thought I was your friend

Turn around, turn around
And I will sing for you a song
I don t know where you been
But you ve been gone too long

Oh, sweet lady, stand beside the sea
Maybe you will find a little time to think of me
Won t you please remember what I tried so hard to be
Yeah, remember what I tried so hard to be

So turn around, turn around
And I will sing for you a song
And I don t know where you been
But you ve been gone too long
