```
              B      E
Stitch up this heart
             B    E
And hide it away
                  B         E
I keep it somewhere dark and safe
                G#m   F#
Watch it fade to grey

C#m             B    E
I still feel this way
                    B      E
When light catches your face
             B         E
You open these stitches again
               G#m   F#
When I see your face
               C#m
When I see your face

E                                       B
I guess what I m saying is I don t wanna die alone
            G#m                F#              E
Keep looking around and there s nowhere left for me to roam

I can t keep my head up
                    B
There s nowhere left to go alow
            G#m   F#
Please take me home

            E
And now we re standing here with blood on our hands
   F#       B                   G#m    F#
You tear me open and dig through my chest
              E
I m so sad and cold with the spaces you left
            B                   G#m   F#
I stitch up my heart again and lay this to rest
   B     E
To rest

B   E   B   E G#m F# C#
```
