

Black Car

Black Tambourine

Awesome song and very simple to learn and play. It s done on electric with lots of
of
and fuzz but I tabbed it on acoustic and it s a pretty nice alternate version.
I d include
but couldn t find any online; the words are a bit muddled due to aforementioned
fuzz but
try my best to decode and add them. Listen to the track for strum rhythm, it s
simple as well.

Intro/Verses: **C F Bb F**

C (x32010)

F (xx3210)

Bb (xx3310)

Note: Only play the top four strings here, I m not sure if I got the chord
titles
right but just follow the fingering tab. Also, emphasize the top two strings
when you strum
those notes stay the same throughout this chord sequence.

Note 2: After you get the hang of it, try hammering on the third fret for the F
and Bb
again listen to the song but it sounds pretty good if you throw in a hammer-on
here and there.

Chorus: **C G Am F**

C (x32010)

G (320003)

Am (x02210)

F (133211)

Note: You can strum a bit more freely here, i.e. hit all the strings, not just
the top four.
