

Out Of Time  
Blur

**Em**                    **F**                    **Em**  
Where s the love song?  
                         **F**  
To set us free  
                         **Em**        **F**  
Too many people down  
                         **Em**                    **F**                    **G**  
Everything turning the wrong way around  
**Em**                    **F**                    **Em**                    **F**  
And I don t know what love will be  
                         **Em**                    **F**  
But if we start dreaming now  
                         **Em**        **F**                    **G**  
Lord knows we ll never leave the clouds

{Chorus:}

**Em**                    **F**  
And you ve been so busy lately  
                         **Em**                    **F**  
that you haven t found the time  
                         **Em**                    **F**  
To open up your mind  
                         **Am**                    **E**                    **C**                    **F**  
And watch the world spinning gently out of time

(Repete o verso seguinte e depois o Chorus)

**Am**                    **E**  
Tell me i m not dreaming  
                         **C**                    **F**  
But are we out of time  
                         **G**  
We re out of time  
                         **F**  
Out of time  
                         **G**  
Out of time  
                         **F**  
Out of time  
                         **C**  
Out of time
