Theme From An Imaginary Film
Blur

```
G#m                      B
What if I told you I loved you
C#m                       E
What if I court you in rhyme
        G#m                       A
In this world there s nothing left
                       B
Well nothing that s new
G#m                       B
What if I told you without you
C#m                E
Loving is simply a lie
            G#m                 A
I m belching blues into the night
                 B                       C
Oh tell me your mine, please say it s true

G                  Em
Oh, shame it s over
C          C#    D
I was the last days of them all
G                  Em
Well, push me over
     C          C#              D
I m flat on my back and I m having a ball
                        D#
And just look who s laughing

G#m                       B
What if I flew like a dove dear
C#m                        E
What if I wooed you in rhyme
            G#m
There s nothing left
            A                 B
Nothing that s good left for me now
    G#m                       B
Oh, I ll just go and sleep with strangers
     C#m                    E
I ll live like a lord in a tower
            G#m                     A
Carouse in the sin, take in too much air
            B
That I can t dream at night
            C
Well, not anymore
```

```
G                 Em
Oh, shame it s over
C                 C#        D
It s been such fun and we ve had a ball
G                 Em
Well, push me over
     C            C#        D
But I ll be the last of people to fall
                        D#
Well just look who s laughing

G                 Em
Oh, shame it s over
C          C#  D
How like a cow bloated on grass
G                 Em
Well, push me over
C        C#         D
Me on my back and you on your arse
G                     Em
Such a shame it s all over
C              C#  D
There are so few days left to grasp
G                 Em
Well, push me over
C        C#         D
Me on my back and you on your lazy arse
                      D#
Well just look who s laughing
```
