Tuning: Standard

Capo: 2nd fret

Intro / Solo Breaks:

**Em**            **D**            **Cadd9**

**Em**            **D**            **Cadd9**

Verse:

**Em**            **D**            **Cadd9**

An obvious display, of feelings that have dissipated

**Em**    **D**                            **Cadd9**

And I don t have a clue where to start

**Em**                            **D**

You wouldn t let me near you

**Cadd9**                            **D**                            **Em**                            **D**                            **Cadd9**

So I settled for the fear that you d be happy with me six feet in the ground

Chorus:

**G**                            **Asus4**

I will crash when your mood defeats me

**Cadd9**

Circle of trash swirls around beneath me

**Em**                            **D**                            **Cadd9**                            **Asus4**

I feel paralyzed most every time you come around to meet me

**Em**                            **D**

Stuck in a place that I don t remember

**Cadd9**

**Asus4**

Was it Sunday or last November

**Em**

**D**

**Cadd9**

**Asus4**

I feel paralyzed most every time you come around to meet me

Emotions vaporize, they disappear before my eyes

I wish for things that sadly have come true

So if I tried to make it right

And if I found my appetite

I'd eat away at all the pain I seem to bring to you
