

Cenotaph
Bolt Thrower

To play this song in tune with the CD you first have to tune your guitar down to D flat (C#). I have written the transcription for drop D tuning as this tune all their strings down, but you need a special whammy bar system to keep reasonable tension on the strings. I know because I asked them when they came to Perth.

- First tune the whole guitar down half a step (one semitone) to E flat played by holding the 5th string at the 5th fret.
- When you have finished, the following chord should be in tune with a low E5 power chord...

E5
 eb|----
 Bb|----
 Gb|----
 Db|-3--
 Ab|-3--
 Db|-3--

Notation: (n) means that this note is carried over from the last bar.
a . under a note means that it is to be played staccato.

It s fairly hard to show timing in TAB, but I ve tried to space the notes to give an indication of how long each should be held. eg. 0 0 0 0 means 8th note downstrokes, 00000000 means 16th note alternate picking. Anyway, enough theory, heres the song.

...fade in play 8x
